WSIS-resultat kring Internets förvaltning

- **”Enhanced cooperation”**
- **Internet Governance Forum (IGF)**

Enhanced cooperation

- 69. We further recognise the need for **enhanced cooperation** in the future, to enable **governments**, on an **equal footing**, to carry out their roles and responsibilities, in international **public policy** issues pertaining to the **Internet**, but **not in the day-to-day** technical and operational matters, that do not impact on international public policy issues.

Enhanced cooperation

- 70. Using **relevant international organisations, such cooperation** should include the **development of globally-applicable principles** on **public policy issues** associated with the coordination and management of **critical Internet resources**. In this regard, we call upon the organisations responsible for essential tasks associated with the Internet to contribute to creating an environment that facilitates this development of public policy principles.

Synliga resultat för regeringar
